GLM Software names Straight Talk Automotive authorized international distributor of OBD 2007

Melbourne, Australia – January 11, 2010 – GLM Software names Straight Talk Automotive as an authorized international distributor of its' professional quality OBD 2007 automotive diagnostic software for use with Scan Tools.

GLM Software, an applications development company and leading producer of vehicle diagnostic software appoints Straight Talk Automotive, an online business supplying professional mechanics and enthusiasts as an authorized international distributor of OBD 2007 automotive diagnostic software. Straight Talk Automotive supplies scan tools, automotive diagnostic software, factory service manuals, and OEM tools to professional mechanics and enthusiasts internationally.

“By partnering with GLM Software, we have added a quality product that will enhance the functions of our new patent pending scan tools” stated JD Durham, Business Development Manger, Straight Talk Automotive. This collaboration will benefit both companies as feedback will help the further development of OBD 2007 with functions that professional mechanics can use to more accurately and quickly diagnose problems including intermittent problems with a larger diversity of vehicles than could be accomplished with hobbyists alone.

OBD 2007, vehicle diagnostic software works with most “ELM” type Scan Tools. OBD 2007 is available from the company website www.glmsoftware.com as a direct download and at select authorized distributors. OBD 2007 retails for \$89.00 USD. There is a FREE 7 day no obligation full function trial available and a FREE lite version with reduced functions.

Founded in 2006, GLM Software develops vehicle diagnostic software that help customers using the “ELM” type scan tools to properly diagnose their vehicles. More information about GLM Software can be found at www.glmsoftware.com
