Car Code appoints Straight Talk Automotive as authorized distributor

St. Charles, MO – October 20, 2009 – Car Code names Straight Talk Automotive as an authorized distributor of the Vehicle Explorer and Car Code enhanced data scan tool diagnostics kit.

Car Code, an applications development company and leading producer of enhanced vehicle diagnostic tools and software kits appoints Straight Talk Automotive, an online business supplying professional mechanics and enthusiasts as an authorized international distributor of Vehicle Explorer Car Code automotive diagnostic kit. Straight Talk Automotive supplies scan tools, automotive diagnostic software, factory service manuals, and OEM tools to professional mechanics and enthusiasts internationally.

“We are proud to include the Vehicle Explorer Car Code automotive diagnostics Scan Tool kit into our products as it is the only reasonably priced bi-directional enhanced data scan tool that we know with the ability to access the Vehicle Data Recorder module for crash data” stated JD Durham, Business Development Manager, Straight Talk Automotive.

The Vehicle Explorer Car Code enhanced automotive diagnostics kit retails for \$249.95. This diagnostics kit is for the person that needs to interact with a vehicle network, including the PCM, BCM, ABS, TCM, VDR and other computer modules. The kit is available online at www.obd-2.com , www.straighttalkautomotive.com and other fine retailers.

Founded in 1995, Car Code develops enhanced data scan tools and software kits designed to bi-directionally interact with vehicle computer networks. Car Code has offices in Saint Charles, Missouri, USA. More information about Car Code can be found at www.obd-2.com
